

DiC OIL & GAS TOOLS

A Brand by Dedicated Impex Co.

DEDICATED IMPEX

www.dic-oiltools.com

COMPANY OVERVIEW

We are one of the leading Manufacturer and Exporter of high quality Products for Oil & Gas Industry. Our Product Range Includes

- Thread Protectors
- Pup Joints
- Packers
- Service Tools
- Cast Iron Products
- OCTG And Accessories
- Casing and Tubing
- Hammer Union
- Flanges
- Flow Control Systems
- Flow Coupling

SOLUTIONS WITH INNOVATIONS

Our Vision

Our goal is to achieve customer satisfaction by providing high-quality products based on integrity, value creation, and superior standards.

Our Mission

To be the most admired and trusted company in Oil Field industry by delivering superior quality products and innovative solutions.

WE ARE FOCUSED ON

Providing the highest quality product for Oilfield Equipment

THREAD PROTECTORS

DIC Thread Protector is used to protect the threads of a pipe during storage and transportation. Thread protectors are manufactured from plastic and steel. Thread Protectors are also available in different sizes from 2-3/8" to 20". We can make the exact size you need!

THREAD PROTECTORS WE EXPORT;

- Plastic Thread Protectors
- Drill Pipe Protectors
- Pressed Steel Thread Protectors
- Composite Thread Protectors
- Cast Steel Lifting Bails
- Clamp-On Casing Protectors
- Tubing and Casing Thread Protectors

CAST STEEL LIFTING BAILS

Cast Steel Lifting Bails are fitted for drilling collars to protect threads during transit and storage. It provides a lifting point when the drill collars require picking up or laying down. The normal lift capacity of the bails is 1 ½ times the drill collar weight.

CLAMP-ON CASING PROTECTORS

The Clamp-On Casing Protectors are used by the Rig operators while handling Tubulars between the rack and the rig floor. They are built on a special spring-steel cage for a superior grip, and specially designed stainless-steel handles ensure quick gripping and removal from the casing threads.

PRESSED STEEL THREAD PROTECTORS

Pressed Steel Thread Protectors protect the API Drill Pipes, Drill Collar's connections, and Tubing. Pressed Steel Thread Protectors are available in standard as well as non-standard sizes. Special sizes can be made as per customer requirements.

LINE PIPE PROTECTOR - END CAP

DIC Line Pipe Protector Caps protect the pipe and prevent them from dirt and damage. It is easy to install or remove from the pipe.

Pipe protector caps can be closed or open-end, custom-designed, and fabricated to your custom needs. Special end caps for extra large sizes and rectangular end pipe is also available.

PIPE PACKAGING FRAMES

DIC Pipe Packing Frame is used for the transportation of drill pipe, tubing, casing, and pipe. It is a safe, efficient, and cost-effective way of packaging tubular products for transporting.

The standard size packaging frames are also available. We can also make as per customer specific requirements.

BUMPER RING

DIC Bumper Rings are designed to improve pipe protection during the handling, transportation, and storage to avoid contact with the outside surface of the pipes, especially for high alloy or chromium-grade pipes.

LANDING NIPPLES

DIC Landing Nipples are run into the well on the completion tubing to provide an exact landing location for subsurface flow control equipment. The internal profiles of landing nipples make them universal. DIC landing nipple is used in standard-weight tubing.

HAMMER UNION

DIC Hammer Unions are designed to join the mud tanks fast without dealing with the flange connections. If the mud tanks are not lined up the right way, the needed hammer unions can always be used to make perfectly non-leak seals that are tightened.

FLANGES

DIC Flanges connect the pipes with each other to fittings, valves, and specialty items such as strainers and pressure vessels. A cover plate can be connected to create a "blind flange."
