# Vent Cleaning Services Dallas TX

**Air Duct Cleaning** is necessary to remove the built-up debris of dust, bacteria, and other particles that have accumulated in your ductwork over the years. These pollutants are then circulated throughout your home every time your HVAC system kicks in. In fact, dirty ducts are a major contributor to indoor air pollution and can even foster mold growth!

**Lavender Care** provides complete residential ductwork cleaning in the Houston, Dallas Texas areas. If it's been a while since you've had your ductwork cleaned, it's time to call Lavender Care Air Quality and Flooring Experts.

# Duct Cleaning Dallas

Lavender Care recommends a complete air duct cleaning every 5 years for optimal home air quality.

Lavender Care also air washes the fans, coils, heat exchange, and plenum of your heating and cooling system. It's important to us that your entire HVAC system be free of dust and debris. After all, if we didn't wash these components they would distribute dust into the ductwork in a matter of days, leaving you not much better off than before your duct cleaning. Unlike some air duct companies, Lavender Care provides a complete and thorough cleaning, from ductwork to heat exchange, for a completely healthy air conveyance system!
